dbsound

SOUNDS GREAT!

THE ART OF PERFORMANCE.
THE SCIENCE OF CLARITY.

"Greatness is not a luxury reserved for the few."

We believe sound is more than energy moving through air. The emotional backbone of every performance, it is the heartbeat of every cinema sequence, and the invisible architecture that defines a physical space.

At db Sound, we do not simply amplify audio; we engineer the physical experience of sound that goes beyond unboxing. From the first blueprint to the final calibration, European precision meets real-world grit, ensuring every note is felt in every corner of the room.

Amidst the blur of offerings of others, we offer only the raw, relentless science of clarity.

We don't just fill a space, we harmonise with it and become the soul of the venue. An experience that simply

Sounds great.

SOUNDS LIKE US

Engineered in America and built for the world stage, db Sound delivers acoustic precision where performance matters most.

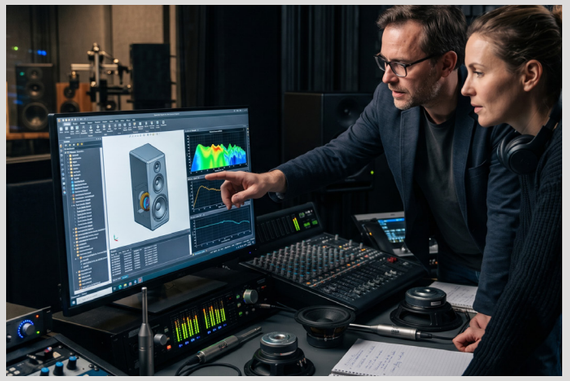

Founded in Delaware in 2007 by Mike Howgard, db Sound earned its reputation in the high-stakes environments of professional cinema and live sound reinforcement. Driven to deliver durability and acoustic clarity, our early Class AB and Class H power amplifiers set a benchmark for bulletproof dependability.

Today, db Sound bridges expertise that spans continents, uniting **American innovation, European acoustic** engineering, and high-precision global manufacturing. Backed by a global team of industry pioneers, we design, refine, and build audio solutions that turn technical specifications into unforgettable acoustic experiences.

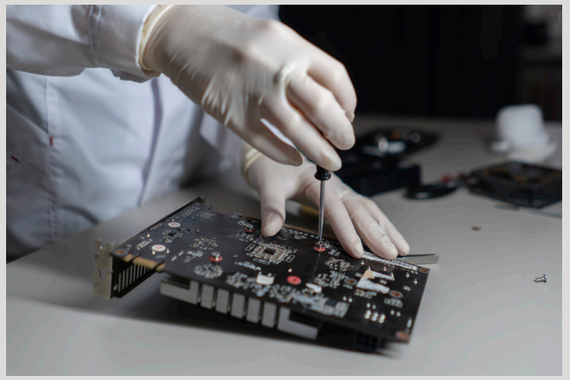

THE SECRET SOUND OF GREATNESS

Our competitive advantage is straightforward. It merely rests on doing the core acoustic and electronic fundamentals right, every single time. We combine custom engineering with efficient global operations to deliver superlative performance at optimal market value.

JOURNEY, AS EVOLVED AS OUR AMBITIONS.

Built on a foundation of reliability and clarity, db Sound's timeline is a story of continuous engineering refinement. What began in 2007 as a specialised solution for pro cinema amplification has grown into an international ecosystem spanning 80 novel SKUs across pro audio, commercial cinema, and luxury residential applications.

2007

Founded in Delaware, USA Pioneered Class AB/H Pro Amplifiers

2009

Expanded into Professional Cinema Systems & Pro Loudspeakers

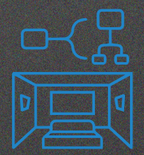

2011

Portfolio Scale-Up: Line Arrays, Cinema Speakers, Power Amps

2015

Initiated Dedicated Private Cinema R&D

2016

PRESENT

18+ Years of Audio Innovation & Global Presence

HEART OF SOUND

Great acoustic design requires both intellectual precision and industrial scale. That's why db Sound operates on a hybrid operational structure designed to deliver European sonic character without the inflated cost structure of traditional boutique brands.

Design Centre (Valencia, Spain):

Led by a specialist engineering team driving acoustic design, crossover topology, and prototype validation.

Electronics Manufacturing (Foshan, PRC):

An expansive 24,000 sq. ft. ISO 9001-certified facility featuring fully automated SMT and PCB assembly lines for 2-channel and 4-channel power amplifiers.

Loudspeaker Production (Guangzhou, PRC):

A massive 12,500 sq. ft. ISO 9001-certified facility housing 4-axis automatic routing machines and integrated dust-free paint lines for high-precision cabinet finishing.

This integration allows us to maintain stringent quality control at every stage of the build, right from raw timber and voice-coil selection to final electro-acoustic QC verification.

GREATNESS, IN ALL SIZES.

Three core segments. 80 purpose-built SKUs. One unified commitment to sound great. Whether powering commercial arenas or reference-grade residential screening rooms, db Sound delivers exact-fit acoustic engineering for every application.

PRO AUDIO

High-impact, field-proven sound reinforcement engineered for exceptional vocal clarity and seamless architectural integration across commercial environments like stadiums, auditoriums, malls, worship, and venues.
