

SURROUNDS HT26 On Wall

Bipolar On Wall Surround System

Elevate your home cinema experience with the exceptional depth and realism of the HT26 On-Wall speaker system. Meticulously engineered within a finely tuned bipolar enclosure, it integrates a 6-inch low-frequency driver alongside dual 1-inch soft dome high-frequency drivers to wrap the listener in an immersive soundstage. Powered by world-class Lavoce drivers, this sophisticated 2-way system outputs remarkable clarity and precision that caters to the most discerning audiophiles. Ready for both Dolby 7.1 and Dolby Atmos setups, its seamless on-wall integration makes it the definitive choice for private theatres and luxury home cinema environments.
