

CUBE SPEAKERS

CUBE 6 | CUBE 8

CUBE Speaker System

Delivering an exceptional blend of point-source precision and high-output versatility, this premium series introduces two compact, ported models engineered for demanding side-fills, portable sound reinforcement, and high-fidelity DJ setups. The CUBE 6 utilises a high-performance 6.5-inch coaxial driver, whilst the larger CUBE 8 steps up to an 8-inch unit—both integrating a 1-inch exit compression driver with a polyimide high-frequency diaphragm.

A key innovation lies in the double demodulated rings, which significantly enhance sound quality by minimising distortion. Constructed from robust 12mm birch plywood, the Cube series projects a wide 100° conical dispersion pattern, ensuring precise time alignment and perfect phase coherence. Powered by world-class Lavoce drivers from Italy, these systems represent a highly reliable, pristine audio solution for clubs, theatres, and multimedia spaces.
