

ARCHITECTURAL SPEAKERS

KA4 | KA5

Ultra Compact Speaker System

The KA4 & KA5 Ultra-Compact Speaker Systems are built to balance high-output versatility with a remarkably small footprint. This premium series introduces two distinct point-source models engineered for clubs, bars, and portable sound reinforcement. The ultra-compact KA4 features a high-performance 4-inch woofer, whilst the larger KA5 steps up to a 5-inch woofer—both seamlessly integrated with a 1-inch soft dome tweeter on a specialized ABS flange.

Every cabinet is constructed from robust 12mm birch plywood with a tuned port design to ensure rich, accurate music playback and side-fill monitoring. Utilising world-class drivers sourced from esteemed European component manufacturers, the KA series projects a wide 90° conical dispersion pattern, offering a flexible and highly reliable audio solution for demanding multi-media spaces and houses of worship.
